

Skyline™

Skyline™ the perfect solution... ...for roof windows

Skyline™ is a roller blind system which has been designed exclusively for roof windows. This neat and modern roller blind is ideal for bedroom windows – although suitable for all roof windows in the home. **Skyline™** is a functional solution and makes an attractive feature in any room.

The Skyline™ System

The **Skyline™** system fits snugly into the fascia of the window. **Skyline™** is manufactured in aluminium and is available in both white and silver to complement all modern window colours. Operation is by means of a tensioned spring roller. The fabric is easy to raise and lower and can be positioned at any point on the window by means of the unique brake system. The aluminium channels ensure minimal light flow around the blind.

Roof Window Blinds

Fabric Ranges

To complement the **Skyline™** system, Decora have available a wide range of roller fabrics in a variety of colours. Blackout and dim out fabrics can be used to create near blackout conditions - perfect for kids rooms or a daytime rest. Easiwipe™ is a collection of wipeable fabrics ideal for bathroom and kitchen environments. Specialised aluminium backed fabrics will reflect the heat whilst allowing the window to be opened for ventilation.

Skyline™ roof window blinds are manufactured for use with all modern roof windows. To place an order for **Skyline™** please state the manufactured window code. This code can be found on the engraved plate at the top of your window and the blind will be produced to the exact window size.

Full fitting instructions are provided to enable quick and easy installation.
