INVESTOR IN PEOPLE

ttVenetian™ the complete venetian system
Tilt & Turn
 ...for tilt & turn windows

TT Venetian™ is an integrated blind system for modern windows. This system provides a practical and stylish solution for shading tilt and turn windows. The extremely slim and elegant headrail fits perfectly inside the beaded area, thus enabling full opening of the window.

To comply with new legislation in building regulations, most new build homes in the UK will have tilt and turn windows fitted. Unlike conventional blinds, **TT Venetian™** allows you to operate your window without obstruction.

The TT Venetian System

The headrail fits neatly into the window bead, concealing all working parts and installation brackets. The blind slides in a transparent cable guiding mechanism, which is integrated into the window. The cable holds the blind in close proximity to the glass and prevents any movement when the window is operated.

ttVenetian™
Tilt & Turn
 Window Blinds

The system is operated by a ball chain mechanism, which will raise and lower the slats and tilt them to any position. A choice of end covers is available to ensure the system is compatible with the window profile. This cover protects the gearbox thereby ensuring trouble free operation.

Colours available

The TT Venetian is available in a wide range of colours and finishes to complement any room. Decora offer over 60 colours including the Woodline collection. Slat selectors are available from the Decora sales team.

To order your **TT Venetian™** blind, please provide the minimum height and width of the internal glazed area of the window.

Full fitting instructions are provided to enable quick and easy installation.
